

Frequently Asked Questions (FAQs) about Trend Surfer A.I. with Billy

Surf's up! 🌊

Matt Rhodes here (giving you the thumbs up), and on behalf of my brother John, Billy and I, we all just want to send you a big **THANK YOU** for the insane response to our new **Trend Surfer A.I.** system.

Our webinar walks through our ultra-simple 4 step system for getting you going as fast as possible with your own trend surfing setup.

🔗 **Go to this link to watch the replay:**

<https://getwebfire.com/replay/rhodes/>

To be completely honest with you...

Many people LOVED this presentation...while others dropped out in the first 90 seconds of the webinar. (Keep reading and you'll see why.)

So, we put together a list of the most common questions we got about it to help you decide if it's right for you.

[Click here to watch the Trend Surfer A.I. Live Webinar Replay](#) (Limited Time Only)

Just keep in mind: once the doors slam shut... **they're closed for good.**

Q: “What is Trend Surfing?”

A: This is all about taking advantage of **price trends and momentum in the financial markets with the help of A.I.**, which tells you exactly when momentum is pointing upwards or downwards in the market with uncanny accuracy. I'm still in awe of how well it works myself.

You will discover how you can actually profit when you ride the wave up, **OR** ride the wave down, just by following [our proprietary set of indicators](#) that we created thanks to many years of A.I. research and data. (Most people don't know A.I. has been around **much** longer than ChatGPT.)

If the price is trending up - when all indicators **turn green** - you can profit by taking a position that benefits from price increases (a “**long**” position).

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

If price is trending down - when all indicators **turn red** - you can take a position that profits from a price decrease (a “**short**” position.)

You can start small by taking these positions with **very little capital** - less than \$300 - and even on the occasions when you are “wrong!” you will be able to abandon ship and get out quickly to preserve the majority of your capital for the next trade.

Yet, the potential returns on every trade are absolutely life-changing, as you’ll see with our backtests that earned at least **\$12,909.90 every 30 days** (that is our *lowest* performing backtest...) as revealed during the webinar.

— — — — — — — —

Q: “What if I HATE the stock market, looking at charts, etc.?”

A: Well, first, you really need to ask yourself...what exactly is it that you hate about the market? Some people hear “financial markets!” or “stocks!” they just *tune out like zombies* immediately.

Break the cycle! Fight the urge to let yourself simply say “I can’t do it.”

Ask yourself - *what* is it, *exactly*, that you hate about it?

- **Do you think it’s too complex and hard to understand?**

It can be a little intimidating for a first timer, but I’d say that understanding the markets is a LOT less complex than building out your own product or website your first time, or even trying to navigate the jungle of things you need to do and understand to run a traditional brick-and-mortar business.

- **Do you think there’s too much risk involved?**

I understand why you might think that, because the markets have a

[Click here to watch the Trend Surfer A.I. Live Webinar Replay](#) (Limited Time Only)

reputation for being risky... but the truth is, you can structure your trades in smart ways that **limit your risk while providing you unlimited upside.**

After all, the way we trade, once a trade starts turning against us, we just **get the heck out of it** and wait for the next trend to come. *It's all about minimizing the number and amount of losses, while maximizing your gains, and that's exactly what Trend Surfer A.I. does.*

- Do you hate the possibility of sometimes losing on your trades?

I understand - it doesn't feel good to lose, but it DOES get easier!

The truth is, it's *literally impossible* to win every single time that you trade, even with [A.I. at your side helping you](#). It just won't happen.

Anyone who tells you that you will win every time you trade is *lying to you*, and you should run as fast as you can the other way.

But - when the odds are tipped in your favor, so that you **earn more money, more often...** while you **lose less, less often...** it's impossible that your account doesn't go up over time, so it makes it much more tolerable psychologically when you have to back out of a trade.

Best of all, you can practice trading to see how much you'd make in as close to a real world situation as you can get before putting any of your own money on the line.

- Do you think it requires too much money to start?

Many people think that you need tons and tons of money to get started.

But geez, I got started with \$50 when I was 12 years old - and the different types of trades we show you how to take often require **just \$300** (often less, actually) in your account.

[Click here to watch the Trend Surfer A.I. Live Webinar Replay](#) (Limited Time Only)

Of course, if you are willing to use more of your capital, you'll be able to scale up faster, but it's absolutely possible to score some crazy (and I do mean *really crazy*) returns from tiny "baby" amounts of capital.

[We show several examples during our live webinar.](#)

Now, after reading this, and watching our webinar...

If you still just flat-out "*hate the market!*" there's not much we are able to do for you, and you definitely should not join us as a founding member.

That's OK - it's seriously **not** for everyone, but just don't let yourself fall prey to the myths you've heard or write it off for no reason.

But I will tell you this: as John and I have said many times to each other... if you hate the markets, you also hate money, because **there's simply no bigger source of it**. And that's the truth.

— — — — —

Q: "Do you have a payment plan?"

A: We weren't originally going to offer this.

But, the demand for a payment plan has been so overwhelming, and we don't want to lock out anyone who is serious about this due to a lack of capital (you do need some to trade - but we also show you how to setup a practice account for free), so we are offering a **4-pay plan** that gets you started for only \$495 today:

<http://trendsurferai.com/shawnflex>

Another option for you may be to sign up with Paypal credit at checkout and use the full-pay option to save money, which is available to certain

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

USA, UK and Canadian residents when you choose Paypal at checkout.

Q: “Does this work outside of the USA?”

A: Yes!

These A.I. indicators work great and this system can be used in just about every country worldwide (in **over 200 countries**, including the USA, UK, Canada, Australia, New Zealand, South Africa, Mexico and many many more.)

We’ll show you how to get going and help you get setup with these A.I. indicators no matter where you’re following this system from.

If your country is not listed above, and you’re not 100% sure if it works in your country, then [feel free to contact our help desk](#) and we’ll check for you.

Q: “How hard is it to setup?”

A: If you can copy-and-paste, then you can get this system going. With ThinkOrSwim, it takes **literally 30 seconds**, and if you’re using a different brokerage or chart setup, it will probably take you about 5 minutes instead.

Either way, we’ll get you off to the races as quickly as possible.

Q: “How much capital do I need to get started?”

A: You can get started actively trading in the way we show you with **as**

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

little as \$300 - often less, in fact. That's because you are able to leverage special types of trades that risk a very limited amount of capital upfront, but can return huge amounts on your initial investment.

We walk through [several examples like this](#) on the webinar:

Options **CALL** Example:

- You purchase 1 **\$415.00** SPY **Call** for \$2.64 (**\$264**)
- Price of SPY at options expiration is **\$425.00**

HOW MUCH WILL YOU MAKE?

\$10.00 (425 SPY Price - 415 SPY Call)

- \$2.64 (Price You Paid)

\$7.36 x 100 shares = **\$736.00** (**YOUR MINIMUM PROFIT**)

By: Matt Rhodes & John Rhodes, "The Rhodes Brothers"

Q: "If this is as good as you say, why would you share it??"

A: There's no risk of saturation with this because there is literally **\$250,000,000,000** worth of capital (that's a quarter of a trillion dollars) that flows *each day* on the U.S. stock market alone.

There's absolutely **zero chance** this gets saturated. Ever.

Plus, even with the A.I. indicators we provide, because everyone trades on different time frames (some people use it more casually and trade 1-2 times a week, while other people use it multiple times a day) so even the

[Click here to watch the Trend Surfer A.I. Live Webinar Replay](#) (Limited Time Only)

combined trades of all founding members isn't enough to make a dent in the liquidity of the trading markets or be "traded against."

Plus, of course, there is a financial incentive for us to offer this - we get more money to trade and scale up with when you join us today. 😊

— — — — —

Q: "How long will it take me to reach \$10k per month?"

A: This is impossible for us to answer, because I don't know when you're timing your trades, what exact trades you're taking, how often you're trading, or how much capital you're choosing to invest with each trade.

What I will tell you is that it's possible to score very large returns from the small amounts of capital that you start with, literally over the course of a few hours of trading, and that our backtests have shown that **even a small number of trades can become highly and consistently profitable.**

— — — — —

Q: "I am a total beginner, can I get this to work for me?"

A: Yes, Trend Surfer A.I. is meant specifically for beginners to get setup and understand what to do as quickly as possible, regardless of any previous experience in the stock market.

(Honestly, it's often **better** if you don't have any previous experience, as you wouldn't have been taught the "wrong way" to do things.)

— — — — —

Q: "How do I make money with this?"

A: You make money by either taking long trades or short trades in the way that we show you. You have several different trading tools available to you that can help you profit from market shifts either way.

[We walk through real examples in extensive detail on the live webinar.](#)

— — — — —

Q: “When do I get the money?”

A: Each time you earn with a trade, that money is **deposited INSTANTLY into your brokerage account** - that means it is ready for you to use again to trade immediately so you can scale up at top speed.

Most brokerages send cash to your bank account within 1 to 2 days, or also offer same-day wire services for a small fee.

— — — — —

Q: “The examples stated prices around 4145, did that mean that you need to have \$4145 invested at that point?”

A: No, you absolutely would have **NOT** needed to have that much invested at that point!

The trend surfing indicators will work for any stock, and the examples and backtests you're referring to are for 1 /ES futures trade, where \$1 of price movement in your favor puts \$50 in your account. For example:

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

**HOW MUCH
WOULD YOU EARN
TREND SURFING?**

Short: 4102 to 4090

Long: 4092 to 4107

Short: 4104 to 4072

By: Matt Rhodes & John Rhodes, "The Rhodes Brothers"

Just calculate the difference!

+ 12 points

+ 15 points

+ 32 points

59 points x \$50 =

1 DAY TOTAL: ~\$2,950.00 Profit

Futures are traded just like stocks, where you can go **long** (if the A.I. indicators are green and pointing up) or **short** (if the A.I. indicators are red and pointing down) except no money is required upfront to actually make the trade.

To make futures trades, you will need to have stocks or cash as collateral in your account to be able to make that trade, and the amount required depends on which brokerage you are using. We cover this inside [Trend Surfer A.I.](#) for you.

You can easily get started and take advantage of the directional trends that the A.I. indicator with quite literally any type of trade. One example we talked about on the webinar is options, where you can put down a small amount on a trade with limited risk (**under \$300**) that can provide an unlimited amount of upside with a multiple on your original return.

Again, you'll be able to try it all for yourself with a practice account at no risk to see how it all works.

[Click here to watch the Trend Surfer A.I. Live Webinar Replay](#) (Limited Time Only)

Q: “What other costs are there?”

A: There are **no other costs** other than the cost of Trend Surfing A.I. and the capital required to make your trades. It is **free** to setup a brokerage account and to setup your practice accounts.

Q: “Are there any upsells?”

A: NO!

Trend Surfer A.I. is a one-time investment and you receive **free upgrades** to all future updates, and there are absolutely **no upsells** after purchase.

Everything you need is included.

Q: “How long are the videos?”

A: You can get started very quickly with this system - the 7 videos you get are a total of 1 hour and 43 minutes long, because it’s simple to get going.

Of course, we also provide unlimited support to clarify anything you need assistance with.

Q: “There is no way this works, not everyone can be rich, why wouldn’t everyone do it?”

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

A: Simply put, not everyone is willing to take the “risk” that you need to take when you trade.

Some people are terrified of the concept of “losing money” - yet literally everyone spends money on non-essentials and “lose money” all the time.

Truthfully, it’s all a matter of understanding basic probability principles (you do NOT need to be good at math as a [Trend Surfer](#), because A.I. and tools do all the calculations - you just need to *understand it!*)...

If you understand this, then you “get it” –

When you **win higher amounts, more often, and you lose lower amounts, less often** than you win - then mathematically, it’s *literally impossible* to lose over the long-term.

The **only way** you can lose is if you risk too much at once, on one trade. You just need to manage your risk. *There’s no need to get greedy.*

Many people simply do not understand this concept, aren’t willing to “risk” the capital required, and shut themselves off from learning anything about it, even though you can practice for free.

In short, an aversion to risk is what stops most people from doing this.

— — — — — — — —

Q: “What happens if a trade turns against me?”

A: You just get out of the trade.

Seriously, that’s it. The A.I. indicators will tell you if a trade has turned against you, **so you don’t need to “guess.”**

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

You wait for confirmation that a new trend has formed, and you enter that trade instead.

— — — — —

Q: “How long do you stay in trades? Can we do this if we only have 2 hours a day?”

A: Yes, absolutely!

You can actually do this in less than 20 minutes a day, if you'd like, and you don't need to do it every day, either (of course, if you are actively in a trade, you **will** want to check your positions at least once per day to make sure the trend is still in your favor.)

— — — — —

Q: “When can I trade? What are trading hours?”

A: Normal trading hours are 9:30am to 4pm ET, Monday to Friday. This is generally when the markets are the most active, but you are certainly not restricted to only trading those hours.

You can also trade stocks on many brokerages, as well as futures, 5 days a week, 23 hours a day - and there are markets open 24/7 as well.

— — — — —

Q: “Does this work for crypto/forex?”

A: To be clear, these technical indicators have not been tested on crypto or forex markets - but since they **are** technical in nature and work as part of a function of price action and momentum in the markets, you will likely be able to trade them successfully in those markets as well.

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

However, we have only tested them and used them personally on the S&P 500 index (SPY) and futures (/ES), [as explained in the webinar](#).

Q: “Is there a guarantee?”

A: Yes, we offer our **100% “Trade It Yourself” Guarantee** that allows you to put it into action for yourself, try practice trading (in fact, we **INSIST** you use a practice account so you don’t risk real money when you’re first starting) and get our 1-on-1 help as you first get started.

In the unlikely scenario that you don’t earn **at least \$1,000 in profit** in your practice account in your first 30 days trading our system, after getting our help, we’ll not only send you a full refund, we’ll send you a \$100 check to thank you for your time.

Here are the simple rules: You **MUST** trade daily. You **MUST** document all your entry and exit trades using our Google Docs spreadsheet template, *at the time of each trade*, using our strategy.

Practice accounts are OK, and refunds issued at our sole discretion.

In short, we expect you to make an honest effort to implement our system and to follow our instructions when you reach out to get help.

Q: “How do I know this can work for me?”

A: This is meant to work for **everyone, including beginners**.

We not only provide a guarantee (see above) but we show you how to get

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

setup with a practice account and test the system in full without risking any of your actual capital.

If you're willing to follow simple instructions and can follow a set of rules to know when to exit and enter trades, then you can absolutely succeed with the Trend Surfer A.I. system.

Q: "What is a backtest?"

A: They are simulations of trading that take the strategy criteria you input, and then output the profit that would be generated if trades were entered and exited using that criteria over a previous time period.

To say our backtests have been "successful" is a drastic understatement.

Here's just one example:

TREND SURFING A.I. STRATEGY

(1 /ES future)

By: Matt Rhodes & John Rhodes, "The Rhodes Brothers"

BACKTEST TIME: 360 Days
CANDLE LENGTH: 1 Day Period

Total # of Trades: 46
Gross Profit: \$157,825.00
Net 360 Day Profit: \$154,918.80

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

This is actually the **LOWEST** performing backtest that we show you.

Believe it or not, you will see much (*much*) higher numbers when you [watch our webinar](#).

Q: “Will I need a credit check to open a brokerage account?”

A: No, most brokerages do not require any sort of credit check. You will be able to get started no matter what your credit history is.

Q: “How long will I get access?”

A: As a founder, you will get permanent access to Trend Surfer A.I. and there are absolutely **NO** renewal fees or additional costs.

You also get an unlimited VIP Membership to the Wait Network included absolutely **free of charge** (a \$97 per month value) with your purchase today, which is loaded with high-profit strategies you can use right away.

Implementing just *one* of the strategies we show you inside is potentially life-changing and has had rave **\$7,500 per week success stories...**

Just a little update to say this ██████ has been golden all week trading both US and globex sessions.

This is a great ██████ It is very obvious it works really well by looking at past charts.

I'm 3 for 3 this week for \$7500 profit.

Q: “Can I do this with a partner?”

[Click here to watch the Trend Surfer A.I. Live Webinar Replay \(Limited Time Only\)](#)

A: YES!

As part of this special offer for new Founding Members, we create a **free VIP** account for any partner, spouse, friend or family member of your choice so you can work with them as you use the Trend Surfer A.I. system.

Studies have shown that people succeed more when they work together - so you will not only have our help, you can work with anyone of your choice to drastically improve your chances at focusing and profiting from putting this system to work for you.

— — — — —

Q: “How long do I have to decide?”

A: This special discounted offer for Founding Members is available only until the countdown timer on the replay page hits zero.

We are only accepting a limited number of new Founding Members at the current price before we launch publicly, and the price will increase if and when we re-release it (even privately) in the future.

— — — — —

Q: “How long do you provide support?”

A: We provide you with UNLIMITED support.

We will not rest until you succeed with Trend Surfer A.I., and we are renowned for providing world class support to all of our customers.

When you succeed, we succeed, and **we want your success story.**

[Click here to watch the Trend Surfer A.I. Live Webinar Replay](#) (Limited Time Only)

Q: “What if I have a question that wasn’t answered here?”

A: We’ve been flooded with questions since we released Trend Surfer A.I., and we tried to answer all of them in this FAQ, but if you have a question that wasn’t answered, then please feel free to [submit a support ticket to our help desk](#) with the subject line: **“Trend Surfer A.I. Question”**

We’ll do our best to answer your questions as quickly as possible. Please allow 24 to 48 hours for a response.
